## **DETAILED ACTION**

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The newly defined recitations of the second threaded shaft having proximal and distal ends (see claims 26 and 27) do not have antecedent basis in the specification. It is noted that the specification should be reviewed to ensure that all of the claimed terms/limitations have a proper antecedent basis therein.

### ***Claim Rejections - 35 USC § 112***

Claims 1, 2, 4-6, 9-14 and 17-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification does not adequately define the operation of the screw mechanism as now claimed. For example, the specification does not describe how the various elements (i.e., the shafts 25 and 27 and actuator 21) move with respect to each other to raise the platform. It appears that rotation of element 21 will somehow cause shaft 27 (and shaft 25) to raise without rotating and when shaft 27 is in an upper most

Art Unit: 3751

position, this shaft will some how engage with element 21 to begin to rotate therewith. Such rotation will somehow cause shaft 25 to rise and thereby continue to raise the platform. However, it is unclear as to when various elements rotate, rise or both and it is unclear as to how certain elements are prevented from rotating, i.e., when element 21 rotates, it is unclear as to what prevents shaft 27 from rotating with element 21 and thereby not enable a raising of the platform.

A detailed explanation of how and when these elements rotate and are fixed with respect to each other in order to raise the platform as claimed is needed.

### ***Allowable Subject Matter***

Claims 1, 2, 4-6, 9-14 and 17-27 would be allowable upon the specification being amended to overcome the rejection under 35 U.S.C. 112, 1st paragraph, set forth in this Office action.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3751

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
